## Meet our **Capi collection**

---

**EN** Capi Europe manufactures unique designer flowerpots for indoor and outdoor use. With our different styles and textures, there is a suitable flowerpot for everyone. Part of our production takes place at our own factory in Tilburg. In addition to the modern design, Capi flowerpots are also high quality. They are lightweight, despite the robust exterior, and weather-resistant.

Flowerpots suitable for every garden, interior, terrace and balcony, for any plant and any style. All the flowerpots have their own design and are available in various colours and models.

**NL** Capi Europe maakt bijzondere design bloempotten voor binnen en buiten. Met onze verschillende stijlen en texturen is er voor iedereen een passende bloempot. Een deel van onze productie vindt plaats in onze eigen fabriek in Tilburg. Naast het eigentijdse design hebben Capi bloempotten een hoge kwaliteit. Ze zijn licht van gewicht – ondanks het robuuste exterieur – en ze zijn weerbestendig.

Bloempotten voor in iedere tuin, ieder interieur, terras of balkon. Voor elke plant en elke stijl. Alle bloempotten hebben een eigen design en zijn beschikbaar in vele kleuren en modellen.

**DE** Capi Europe stellt besondere Designblumentöpfe für drinnen und draußen her. Dank unserer verschiedenen Stilrichtungen und Texturen findet jeder einen passenden Blumentopf. Ein Teil unserer Produktion findet in unserer eigenen Fabrik in Tilburg statt. Capi-Blumentöpfe überzeugen nicht nur durch modernes Design, sondern auch durch ihre hohe Qualität. Trotz ihrer robusten Außenseite sind sie besonders leicht und witterbeständig.

Blumentöpfe für jeden Garten, jedes Interieur, jede Terrasse oder jeden Balkon. Für jede Pflanze und jede Stilrichtung. Alle Blumentöpfe haben ein eigenes Design und sind in vielen Farben und Modellen erhältlich.

**FR** Capi Europe fabrique des pots de fleurs design exceptionnels pour l'intérieur et l'extérieur. Grâce à notre diversité de styles et de textures, nous proposons des pots de fleurs selon les goûts de chacun. Une partie de notre production a lieu dans notre propre usine à Tilburg. En plus du design contemporain, les pots de fleurs Capi sont de qualité supérieure. Ils sont légers - malgré l'extérieur robuste - et ils résistent aux intempéries.

Des pots de fleurs pour chaque jardin, intérieur, terrasse ou balcon. Pour chaque plante et chaque style. Tous les pots de fleurs ont leur design propre et sont disponibles dans un grand nombre de couleurs et de modèles.

Toine van de Ven

**The founder**

Behind the planters, there is a story that begins in 1997. More than 20 years ago, Toine van de Ven started a one-man business in Udenhout. Over the years, his product range changed from heavy concrete sculptures and ornaments, to heavy Terrazzo planters. The planters were then replaced by lightweight Terrazzo-look planters to make them easier to use. These planters are still a big part of the Capi collection today. They have been enriched by the sustainable Made in Holland collection that originated a few years ago, along with the biggest change in Capi's history: the introduction of reshoring. Toine would never have imagined that delivering heavy sculptures would become the preliminary stage for the Made in Holland products available these days. Within 20 years, Toine has made several big changes, with reshoring being the largest one. Nonetheless, the company has always been driven by sustainability, optimism, innovation and common sense.

These are values that you will still find in Capi's DNA.  
And so the story continues...

**Together  
we grow**

**The company**

Behind the planters, there is the company's headquarters in the Netherlands. Part of our production takes place in our factory in Tilburg. Not only our planters, but the entire company is built around the concept of sustainability. Our recyclable planters have a long lifespan, are made through a sustainable production technology and they protect the roots of the plants. It is not a coincidence that Capi Europe has an orange logo. This colour represents the fact that we work from the Netherlands, in order to avoid unnecessary transport costs.

Since November 2017, we have operated from our headquarters in Tilburg, which presents us with lots of opportunities for the future. It is a place where we can grow, but can also think about the next generation. In our headquarters we don't use gas, and we use the warmth of our production process to heat the rest of our building. Our sprinkler system is filled by rainwater and the LED lighting in the warehouse is equipped with motion sensors. These steps are the beginning of a scenario whereby we will become completely self-sufficient in terms of our energy needs in the future.

**The people**

Behind the planters, there are a lot of people working on our mission. Our goal is to connect with our local community and embrace a green lifestyle together. We want to create an experience for the home and garden that doesn't just look good, but is also sustainable. These goals start by ensuring that our own Capi community lives up to our values, by telling our story and guaranteeing a high quality result to our partners, clients and customers.

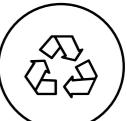

Just as in the early days, Capi Europe is still distinguished by honesty, innovation and unsurpassed service. In this way we can work on a sustainable future for ourselves, but also for the next generation. Together we grow!

# From powder to planter

## 1 Our production process

Capi Europe has developed its own rotation moulding method for the production of the Made in Holland pots. We are the only ones in the world to use this particular rotation moulding technique. With this process, we save up to 80% of the energy compared to traditional rotation moulding.

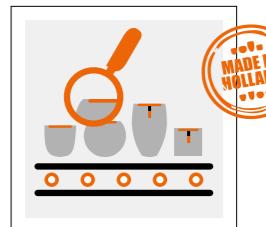

- The Capi robots work 24/7

## 2 Spinning around

The Made in Holland flowerpots are made from a mixture of polyethylene and wood fibres. These raw materials are poured into the mould using a filling system. This is heated, in order to melt and liquefy the mixture. The machines spin around so that everything is distributed throughout the mould. The substance is then cooled to produce the flowerpot. The two layers of the pot (outer layer and insulating layer) are made in a single cycle.

- Each pot model, texture and size has its own mould

## 3 Finishing touches

Once the flower pots are removed from the machines, they proceed to the quality control area via a conveyor belt. An inspection is carried out by our product specialists. Afterwards, each pot is provided with a Capi label, and a barcode. The flowerpots are then wrapped, placed on a pallet and made ready for shipment!

- The pots are roughened to give them a natural look

# Our unique insulating layer

The Made in Holland planters are made of a mix of polyethylene and wood fibres, and they consist of two layers. The outside layer shows the design of our planters. The second layer is a unique **insulation layer** on the inside of the pot. This bright orange layer protects the roots of the plants.

**Light-weight** - The planter resembles natural stone, but has the unexpected benefit of being lightweight.

Double layer - Ensures a stronger planter which is **fracture-resistant**.

Protects your plants - Plants will live longer, because the orange **insulating layer** protects the roots of the plant from heat in the summer and frost in the winter.

Sturdy surface - The surface has a sturdy natural stone appearance because of the wood fibres.

# Filling tip

**Choose an impressive green plant**

**2**

**Fill the planter for 1/3 with hydro grains**

**3**

**Fill the planter for 2/3 with soil**

**1**

**Outdoor only:  
Drill a drainage hole (25mm)  
and cover with mesh**

**EN** Would you like to use the flowerpot indoors? Then make sure there is no drainage hole in the bottom of the flowerpot. If the flowerpot does have a drainage hole, use an insert. Would you like to use the flowerpot outdoors? Then make sure the flowerpot has a drainage hole. If the flowerpot does not have a drainage hole, drill one of about 25 mm yourself.

Cover the drainage hole before you fill the pot, for example with gauze, so the hole does not become blocked but excess water can still drain away.

Next, fill the pot to about 1/3 with hydro grains. Hydro grains improve the water balance in the pot, so the plant can grow better. The rest of the pot can be filled with potting soil. As decoration, the top layer can be covered with hydro grains or wood chippings, for example. This also stops the top layer from drying out so quickly.

Put the flowerpot where you want it before you fill it, so you don't have to move it when it is full. If you do want to move the flowerpot, pick the whole pot up rather than holding it by the edges. Otherwise, the weight can cause the flowerpot to crack.

**NL** Wil je de bloempot binnen gebruiken? Zorg dan dat er geen afwateringsgat in de onderkant van de bloempot zit. Heeft de bloempot wel een afwateringsgat, gebruik dan een inzetpot. Wil je de bloempot buiten gebruiken? Zorg dan dat de bloempot een afwateringsgat heeft. Heeft de bloempot geen afwateringsgat, boor dan zelf een afwateringsgat van ongeveer 25 millimeter.

Dek het afwateringsgat

voor het vullen af, met bijvoorbeeld gaas, zodat het gat niet verstopt kan raken, maar het water wel weg kan lopen.

Vul vervolgens de pot voor ongeveer 1/3 met Hydro korrels. De Hydro korrels zorgen voor een betere waterhuishouding in de pot, waardoor de plant beter kan groeien. De rest van de pot kan gevuld worden met potgrond. Ter decoratie kan de bovenste laag afgedekt worden met bijvoorbeeld

hydrokorrels of houtsnippers. Dit zorgt er tevens voor dat de bovenste laag minder snel uitdroogt.

Zet je bloempot alvast op de juiste plek voordat je deze gaat vullen, zodat je deze na het vullen niet meer hoeft te verplaatsen. Wil je de bloempot wel nog een stukje verplaatsen, pak de bloempot dan in zijn geheel op en niet bij de randen. Door het gewicht kan de bloempot dan gaan scheuren.

**DE** Möchten Sie den Blumentopf im Innenbereich verwenden? Achten Sie dann bitte darauf, dass der Blumentopf keine Entwässerungsöffnung an der Unterseite hat. Falls der Blumentopf eine Entwässerungsöffnung

Möchten Sie den Blumentopf im Außenbereich verwenden? Achten Sie dann bitte darauf, dass der Blumentopf eine Entwässerungsöffnung an der Unterseite hat. Falls der Blumentopf eine Entwässerungsöffnung

hat, können Sie einen Kunststoffeinsatz verwenden. Möchten Sie den Blumentopf im Freien aufstellen? Achten Sie dann bitte darauf, dass der Blumentopf eine Entwässerungsöffnung hat. Falls der Blumentopf keine Entwässerungsöffnung hat, können Sie selbst eine bohren (ungefähr 25 Millimeter).

Decken Sie die Entwässerungsöffnung bitte vor dem Befüllen ab, zum

**Make sure to drill a drainage hole for outdoor use!**

# Capi accessories

## Rain barrel NL

The climate is changing and the weather is becoming more extreme. There are more days with heavy and prolonged rainfall. The risk of flooding and water damage is increasing because the sewer system cannot handle the high amounts of rainwater.

At the same time, there are more periods of sustained heat and drought. With all of the associated negative consequences. To help maintain a water-friendly garden, Capi has developed this rain barrel.

### Reuse rainwater

Rainwater is soft and that's good for your plants. You also save on tap water. And that's good for everyone.

**Bee hotel**

'If the bee disappeared off the surface of the globe then man would have only four years of life left.' - Albert Einstein

If bees are that important, why are they threatened with extinction and why not help them? By placing a Bee hotel in your garden you don't only protect the solitary bees, but also assist the bee in reproduction.

Good to know: This bee hotel only attracts the solitary bee, which are known for being kind to people. So you don't have to be afraid of being stung!

#### EN Pot inserts

With our pot inserts, you can also use outdoor pots with a drainage hole indoors. If you have a pot with a drainage hole, you should not use it indoors without an insert, because excess water will drain away and may damage your floor. A flowerpot with a drainage hole must therefore always have an insert when used indoors.

#### NL Inzetpotten

Onze inzetpotten maken het mogelijk om buitenpotten met een afwateringsgat ook binnen in het interieur te gebruiken. Indien je een pot met een afwateringsgat hebt, kun je die zonder inzetpot niet binnen gebruiken, want dan stroomt het water weg en beschadigt je vloer. Bij een gat in de pot dien je dus altijd een inzetpot te gebruiken.

#### DE Kunststoffeinsätze

Mit unseren Kunststoffeinsätzen haben Sie die Möglichkeit, Töpfe für draußen mit einer Entwässerungsöffnung auch im Haus zu verwenden. Wenn Sie einen Topf mit einer Entwässerungsöffnung haben, können Sie diesen ohne Kunststoffeinsatz nicht verwenden, weil sonst das Wasser abläuft und Ihren Fußboden beschädigt. Bei Töpfen mit einer Öffnung müssen Sie also immer einen Kunststoffeinsatz verwenden.

## Why do planters have a drainage hole?

This drainage hole allows the soil to breathe, which ensures healthy roots. This makes the planter frost-resistant. The water can drain from the planter preventing the soil from freezing, expanding and bursting out of the planter.

Be sure to put the planter on raised pot pads to ensure the planter has sufficient drainage.

## Nature Groove

# Nature Groove

New series

The new Nature Groove collection is inspired, as the name says, by grooves. In particular, it takes inspiration from the vertical grooves in rocks and mountains that arise from natural changes occurring over the years.

Without water hole, but may not be 100% watertight
